Honeycomb paper paper machine

——— FWB525S

Product instructions for use

Before installing and using the product, please read the instruction manual carefully, and properly keep and spare!

➤➤ Preface

Thank you for choosing the company's products, the company sincerely provides our distinguished customers with excellent quality products, and will provide professional and reliable after-sales service.

To confirm the use of pedestrians to the people. Personal safety and instrument safety and integrity. Please use it in strict accordance with this instruction manual.

➤➤ Special explanation

This instruction shall not be used as a basis for any request to the Company.

The company has the right to interpret this instruction manual.

➤➤ Product use

[Honeycomb paper automatic paper issuing machine] It is suitable for honeycomb wrapping paper. Because the honeycomb wrapping paper has a pre-cut hole, the paper opening machine will stretch the honeycomb paper wrapping paper into a three-dimensional structure, which can effectively support and package items, and play a good buffer role.The honeycomb paper issuing machine can also place the Sydney paper at the same time. When the machine is running, take the honeycomb paper and Sydney paper together to simplify the packaging steps and make the product package in one step and easy to use.
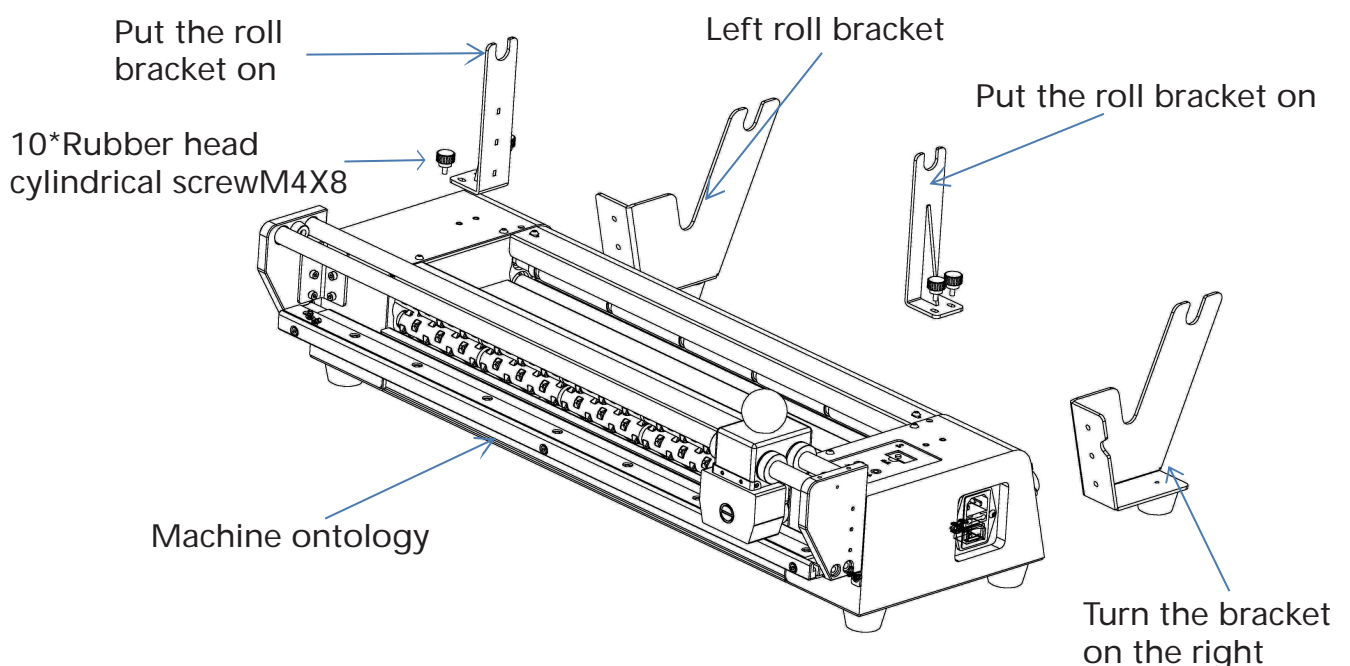

➤➤ Product characteristics

1, Double drum differential operation, high stability.
2, High power and high capacity motor, more lasting service life.
3, The belt drive system, light noise, small vibration.
4, High temperature resistant silica gel, corrosion resistance, non-toxic, high temperature resistance.
5, The independent buffer spring is fixed in the structure, smooth and no lag.
6, Independent research and development of control panel, simple interface, perfect functions, easy to operate.
7, The structure design is more reasonable, small in appearance, and portable to use.
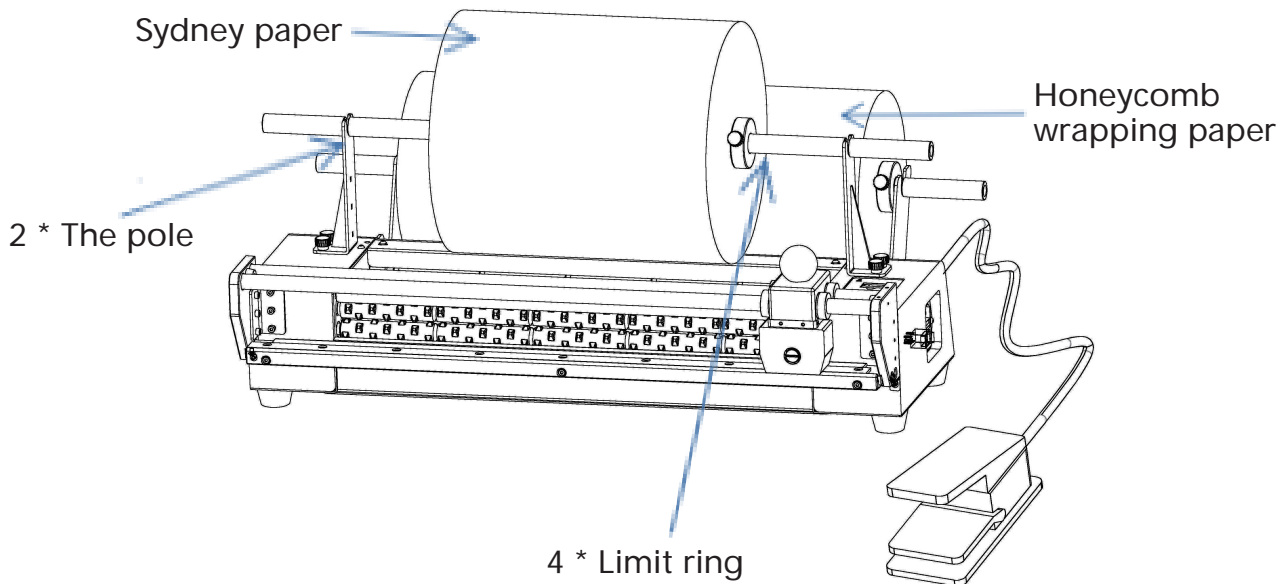

Product Parameter

Maximum honeycomb paper diameter (mm)	230mm
Maximum honeycomb paper length (mm)	510mm
Power Supply Voltage (V / Hz)	110~220V/50~60Hz
Consumed power (W)	100w
Net weight (kg)	21kg
Machine gross weight (kg)	24kg
Appearance dimensions LWH (mm)	689 ×496×315mm
Outer box dimensions LWH (mm)	720mm*450mm*200mm
Top speed (m / min)	25m/min
Ambient condition	Temperature Temperratuer5~40 ° C; 850% RH of humidity Humidity

Instructions for product installation and use

1. Install bracket

Put the roll bracket on

10*Rubber head cylindrical screwM4X8

Left roll bracket

Put the roll bracket on

Machine ontology

Turn the bracket on the right
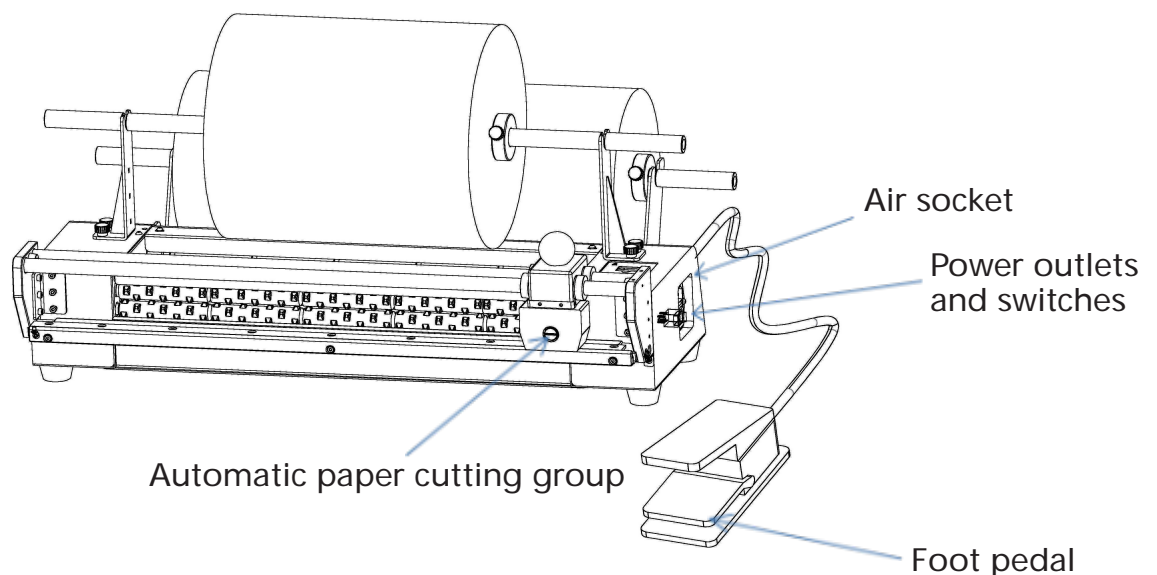

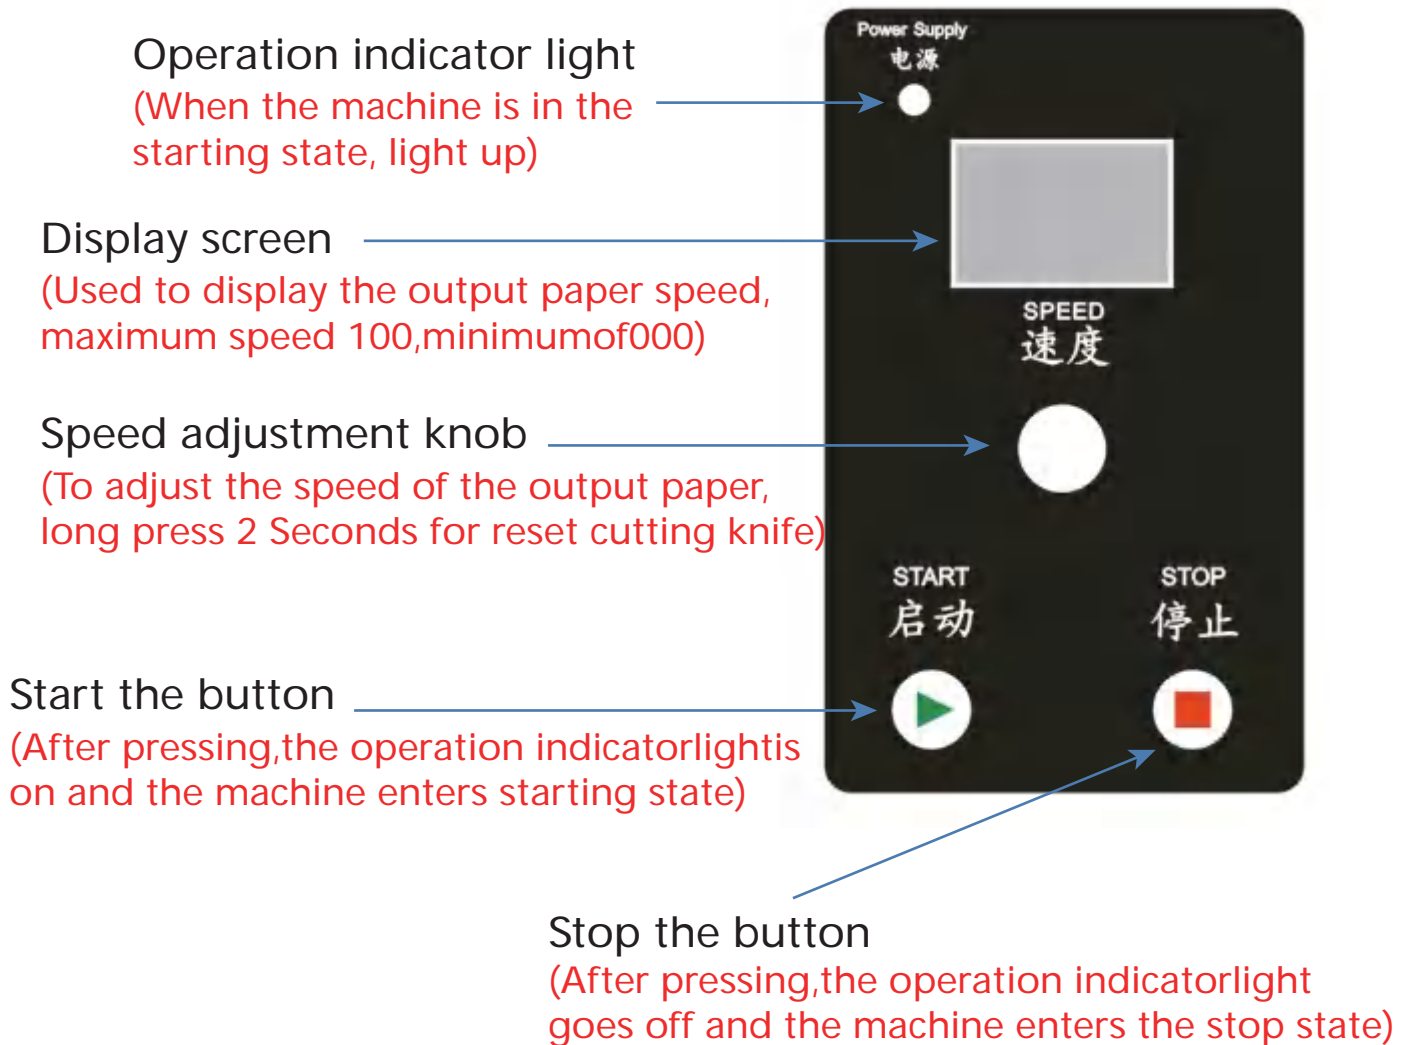

2. Put the honeycomb wrapping paper and snow pear paper into the bracket rod, and put it into the machine card slot. Then connect the power supply and the foot switch

Sydney paper

Honeycomb wrapping paper

2 * The pole

4 * Limit ring

3. Send the appropriate paper length according to the items to be wrapped. After the package is finished, hold the black rubber wood handle ball in the manual paper cutting device and push it in the direction of the paper.(When cutting the paper, you should hold the handle ball with one hand and cut the paper, and the other hand slightly pull the wrapped items to make tension on the surface of the paper.)

Air socket

Power outlets and switches

Automatic paper cutting group

Foot pedal

Operating interface description

Operation indicator light
(When the machine is in the starting state, light up)

Display screen
(Used to display the output paper speed, maximum speed 100,minimumof000)

Speed adjustment knob
(To adjust the speed of the output paper, long press 2 Seconds for reset cutting knife)

Start the button
(After pressing,the operation indicatorlightis on and the machine enters starting state)

Power Supply
电源

SPEED
速度

START
启动

STOP
停止

Stop the button
(After pressing,the operation indicatorlight goes off and the machine enters the stop state)
