

MH-FG-800B Mini Stretch Wrapper With Top Press (Box Wrap Machine)

Descriptions:

Technical characteristics and performances have been refined and improved by us, according to years in the pallet packaging machinery manufacturing experience. All of the using materials are of high quality and the high technical standards for all mechanical and electronic components merge with highly efficient and precise assembling and testing procedures; this leads to the high performance production, safe and durable products. Our stretch wrapping machines have always been synonym to reliability, easy use and maintenance, and most of all, to strict compliance with safety rules and standards.

Machine features:

- Compact machine, easy to carry
- Can wrap a variety of small pressured and stand objects stand
- With a top pressure, more stable and secure
- All the action can operate independently, as required
- Inverter adjust film tension
- To prevent damage to the goods during transfer way to prevent dust, moisture
- CE certification, optional

Specification	
Power supply	1P AC220V 50Hz, gas source: 0.4~0.6 MPa
Wheel speed 转盘速度	0~20 rpm
Table height 台面高度	500mm
Wheel diameter 转盘直径	Φ400mm (Φ600mm optional)
Cylinder stroke	500mm
Effective height 可缠绕物品的高度	900mm
Bearing weight	60kg
Packaging materials (Film)	LLDPE stretch film width≤500mm, out diameter≤280mm
Machine size	L1470mm x W460 x H (1860~2260) mm
Options	①magnetic resistance pull type MH-FG-800AE, ②simple resistive pull type MH-FG-800AS, ③ 12 paragraph resistance pull type MH-FG-800AX, ④ pretensioners type MH-FG-800B ⑤ two-stage pre-pull type MH-FG-800BX ⑥ pull off the pre-film-type MH-FG-800BK, ⑦ without capping lift MH-FG-810
Noise	≤75DB (A)
Environment	Humidity ≤ 98%, Temperature -10-40°C

Working process:

1. Put the object on the turnplate and press the object with top presser
2. Connect film with the surface of the object
3. Start the machine, the machine will automatically wrap around the object
4. After the wrapping operation is finished, take away the object

Parts and tool which are delivered with machine:

Easily damaged parts:
